Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "gap" or the "plurality of ribs" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The Examiner notes that a cylindrical pot nowhere has a "side wall formed to lie in a plane;" rather the side wall of such a ceramic cooking vessel could be said to have a tangent plane at each point.

Claim Rejections - 35 USC § 102

Claims 1-12, 14-16, 19, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. 6313446 (US'446).

Referring to Figs. 1 & 2 and col. 3, line 31, through col. 4, line 1, US'446 discloses an aluminum foil, disposable crock pot liner 16 as claimed, conforming to the ceramic inner cooking vessel 14 and including a flange 46. The flange does not interfere with operation of the crock pot since it is *prima facie* operational, and clearly the flange allows steam to escape from the pot exactly it does from all pots whose lid only rest on the pot flange: the lid does not form an air-tight seal since it is not a pressure cooker, and the lid would have a pressure release valve if it were. Applicant's comments in paragraph 8 of the specification therefore indicate an essential misunderstanding of the slow cooker of US'446, which is not in danger of "likely exploding."

Regarding claims 4 and 12, and referring specifically to Fig. 2, the perimeter engaging portion 48 of the flange defines a gap between the edge and the portion over which it is folded back, thus meeting the claim limitation.

Claim Rejections - 35 USC § 103

Claims 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over US'446.

The claims differ from US'446 only in calling for a message printed on the liner and an oval shaped crock. These do not patentably distinguish the claimed invention from the prior art. It would have been obvious to label the liner with size or use details, as is commonly done on diverse cooking accessories, and to use such a liner in an oval cooker since it is a conventional alternative shape used for larger quantities of food, and exactly the same advantage obtains.

Allowable Subject Matter

Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
